## Surround Vision Recorder

If equipped, this system records the 360° camera views to an SD card. Only images are recorded, no sound. An SD card will be needed for this system. The minimum recommended SD card specifications are at least 64GB, with a FAT32 file system, and a video class of V30 or greater.

Continuous use of the Surround Vision Recorder will degrade the performance of the SD card and will require replacement of the SD card over time.

Insert an SD card into the card reader in the trunk. Disable the system from the playback screen before removing the SD card from the reader. Do not remove the card while recording is enabled. This could corrupt the video file and/or the SD card.

Other files should not be stored on the same SD card as the surround vision recorder files. Storing other files on the same card may increase recording start up and playback time or result in a loss of data.

**To Activate** Touch Video Recorder on the Home Page. Touch the red dot. The red dot will illuminate when the video recorder is on. It will remain on until it has been turned off. Recording will start after exiting the playback screen. Advise other drivers and occupants of the vehicle that video images are being recorded.

**To Deactivate** Touch Video Recorder on the Home Page. Touch the red dot.

Select from the following when the vehicle is in P (Park).

**Exit** Touch X to exit this application and return to the previous app.

**Video List** Touch to display a list of the most recent and saved videos. Touch the delete button next to the name to delete a saved video.

**Rewind** Touch to rewind the video. Touch again to increase speed. Continue touching to stop rewinding.

**Play/Pause** Touch to play or pause a recorded video.

**Fast Forward** Touch to fast forward the video. Touch again to increase speed. Continue touching to stop fast forward.

**Save** Touch to save a video. This protects the video from being erased. Once the SD card is full, the oldest files will be overwritten unless they have been saved.

**Camera Views** When opening the Video Recorder, the previous file will show all camera views and can be played. Icons in the upper right corner of each view indicate which camera. Touch one of the views to
