

2016 Cadillac ATS-V: Press Release: Cadillac Opens Ordering for 2016 ATS-V

Cadillac Opens Ordering for 2016 ATS-V

Dual-purpose performance luxury compact designed for the track, touring

2015-02-1

Cadillac Press Release

DETROIT – Cadillac dealers have begun accepting orders for the 2016 ATS-V – the brand’s inaugural luxury compact performance car starting production this spring.

Available in sedan and coupe forms, the twin-turbocharged ATS-V offers a dual-purpose luxury performance experience: a car with true track capability straight from the factory with sophisticated road manners.

Powered by the segment’s highest-output six-cylinder engine – the Cadillac Twin Turbo rated at 455 horsepower (339 kW) and 445 lb-ft of torque (603 Nm) – the ATS-V achieves 0-60 performance in 3.9 seconds and a top speed of 189 mph. The Cadillac Twin Turbo engine is backed by a six-speed manual – with Active Rev Match, no-lift shifting and launch control – or a paddle-shift eight-speed automatic transmission featuring launch control and Performance Algorithm Shift.

“The V-Series is the ultimate expression of Cadillac’s re-ignited product substance and the passion at the core of our brand,” said Johan de Nysschen, Cadillac president.

“The ATS-*V* expands the V-Series lineup, bringing a new kind of performance character to Cadillac. Lightweight, agile and potent, the ATS-*V* will make an ideal pairing with the larger and even more powerful all-new 2016 CTS-*V* midsize sedan, which arrives later this summer,” he said.

In the U.S., the 2016 ATS-*V* sedan carries a starting price of \$61,460 and the ATS-*V* coupe is priced from \$63,660. Consumers can order ATS-*V*s now through dealers and begin specifying their own ATS-*V* online at www.cadillac.com in April.

Additional performance technologies built into the ATS-*V* include:

- Brembo high-performance brake system developed for track-day performance capability straight from the factory
- Third-generation Magnetic Ride Control, which delivers 40 percent faster damping response
- Integrated chassis controls that provide balanced performance for touring and the track, including class-exclusive Performance Traction Management
- Tri-compound tires offering excellent grip with extended tire wear
- Available downforce-generating track aerodynamics package
- Standard carbon fiber hood

An available Performance Data Recorder allows drivers to record high-definition video, with data overlays, of their driving experiences on and off the track, enabling sharing on social media.

More than just a desirable road car, the ATS-*V* will also become Cadillac’s entrant into the world of motorsports. Even before the new car hits the showroom, Cadillac Racing’s new ATS-*V.R* racecar will begin the Pirelli World Challenge GT 2015 season March 7-8 at the Circuit of the Americas in Austin, Texas. Cadillac Racing is the three-time defending manufacturer’s and driver’s champion in the series, which features legendary marques such as Audi, Ferrari and Porsche.

The ATS-*V* will be assembled at the Lansing Grand River assembly plant in Michigan.

Editors' note: Manufacturer's Suggested Retail Price excludes tax, title, license, dealer fees and optional equipment.
